“ I have heard it said time and time again that there is a start date and a end date in ones life. But more important is a little dot between those dates, that dot is what we did in between those to dates. Jason your dot with me was short about 2 years in the warsaw area. I remember the day we meet at shi. I remember some travels we had to and from plymouth and some time around the fire pit, those memories of you will never fade. You brought something good when you came to us compassion love and a understanding of addiction and how powerfull that can be, you help run the house for almost a year and you gave of yourself without any strings to those who would listen, about it. In the walk of life I believe that a man is judged on not what he has in a material objects but is judged on what he left in how he gave of himself with helping those around him with love understanding and wanting to help with addictions. You left that at SHI, you touched us all, you did that and never once asked for anything in return. Tou touched our hearts and souls,
