Ken and I worked together in the control room on units 17 and 18 at RMSGS. In spite of our major differences when it came to politics we agreed on a bunch of movies, television shows and various other things. We shared a lot of laughs, stories and movies reviews. I enjoyed working with him. We were on "D" shift together as part of the best crew of guys you could ask for. We all worked together, shared our knowledge and had each other's backs covered when it came to safety and dealing with bosses and sometimes other crews. His loud boisterous ways will be missed. My condolences to all of his family and friends for your loss. Sincerely: Bob Parker.
